

# SAFETY IS A TEAM SPORT

*Safety Culture: An environment where safety is woven into every dimension of operations and is actively managed by the entire workforce.*

## SAFETY BEGINS WITH COMMUNICATION, BUY-IN & YOU!

*Having a safety policy on-the-books is not enough! Safety only happens when everyone in the organization becomes an active supporter. Unfortunately, communicating these ideas and getting buy-in can be quite challenging. Our training strategy attacks this challenge head on by:*

- **Modeling** your actual business situation to speed transference.
- **Engaging** your entire team to maximize buy-in.
- **Practicing** safety concepts & behaviors in a safe environment.
- **Focusing** on direct and immediate application.
- **Reinforcing** your management style and culture.

## WE UNDERSTAND YOUR BUSINESS & CULTURE!

*If training is not consistent with your organizations culture and management style, there's very little chance it will last.*

## LEADING WITH SAFETY DRIVES SUCCESS

*While the immediate target of any safety initiative is to reduce accidents and injuries, the long-range impact to the organization is considerable. From increased production and lower operating costs to improved employee retention communication. Safety is a mindset that directly impacts:*

- **Retention**
- **Production**
- **Operating Costs**
- **Employee Engagement**
- **Labor Relations**
- **Communication**
- **Teamwork**
- **Collaboration**
- **Project Planning**
- **Commitment**
- **Empowerment**
- **Trust & Respect**

## ASK YOURSELF... "CAN I AFFORD NOT TO USE LTI?"

1. Professional trainers who have lead "World Class" safety initiatives.
2. A strategy designed around your business objectives and the unique needs of your team.
3. Training that keeps everyone engaged and focused on their role in the process.
4. A process that targets ownership and personal responsibility by EVERYONE on the team.
5. An approach that builds trust, respect and communication.
6. Solutions that are aligned with your organizational culture and individual management style.
